Renewals

It's come round again, another year and it's time for renewal of your pilot's licence.

Vale

Hans passed away on 21st June, 2022 at the ripe old age of 94. Well known to our older RAMS Members Hans was a very articulate man, a true gentleman from the old school.

Hangar Out

Two pilots just hangar-ing and discussing who knows what!

Winging It!

Johnny J's dearly loved wing was returned to him by Geoff after John J lost it somewhere south of the field.

Whatever Next!

Mike S has got his inventive brain in gear again with this not yet patented launch pad. To see a video of the launch go to RAMS website.

Donation

A very generous gentleman popped in at the field recently and dropped the Bixler off as a gift. We just had time to thank

him before he left. It's been tidied up, bound and a receiver and battery inserted and hey presto after a couple of flights is ready to train novices. (Photo on right).

The V1's had a similar launch pad.

Not just a Tosser!

To prove that Ron is not just the club's best Tosser and because he's got some pretty severe competition, Ron became the recognised club Fixer. His prowess is shown here in the photo, having repaired what was the result of the club's trainer Apprentice having an ugly meeting with the concrete. I'm reliably informed that Ron who, by the way has royalty connections, is very proud of his new title. He is also ready to take on any comers challenging him for the two titles, Best Tosser and Best Fixer. (Photo lower right.)

AGM

Well it's come round again so quickly that you might have missed the date of the RAMS AGM which will be held at the field, 1030h on 07/08/22. All positions are vacant.

Gotcha

When you try to hit another aeroplane it proves to be near impossible. However, Max's Walrus survived the ordeal in the battle of the youngsters. Jessie's Dad has got another repair job on his hands.
